

[Home](#) / [Custom-made products](#) / [Rubber profiles and frames](#)

No matter what type of sealing problem there is, we find the optimum solution quickly.

In addition to our extensive section of standard profiles, we are specialised in custom-made products. We offer profiles based on customer drawings or technical specification for the most diverse types and areas of applications.

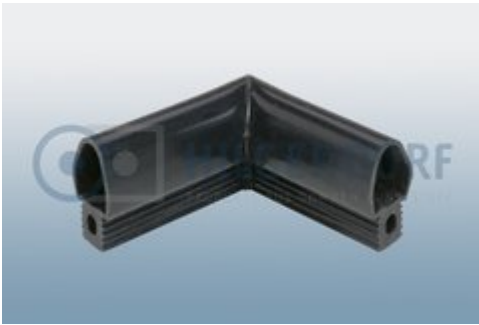

Profile materials

Our assortment comprises all traditional elastomers and TPEs. Our employees select the ideal material based on your requirements.

For use with fire protection requirements, we also have special composites in accordance with EN 45545-2:2013, DIN 5510-2 or NF F16 101.

The following are included in the scope of delivery:

- Mono profiles
- Duplex profiles made of various materials or materials of various hardnesses
- Sealing profiles with metal clamps and various materials
- Edge guard profiles
- Profiles made of sponge rubber, also in colour
- Surface-coated or flocked profiles

Frame vulcanisation

We deliver complete profile systems for various applications in mechanical and plant engineering as well as in the railway industry. Sealing frames accurate in every detail with vulcanised corner connections are manufactured with various production techniques.
